

KOSSA Results:

As many of you know, Career and Technical Education students are tested each February in select areas. These tests are statewide, standardized tests in a career field. They are by no means an easy assessment. This year we had several students to Pass, receiving a state awarded Skills Standard Certificate in their testing area.

Congratulations to the following students and the Family and Consumer Science Department, especially Tammy Nance. This was her career major and she works very close with these students in food preparation.
