

# Google Resources

There has, understandably, been an increase in interest in remote teleconferencing software among our teachers and staff. We have access to Google Classrooms and Google Meet as part of our suite of Google apps for education. You can create a meeting and share a link to your students, schedule classes and invite students and attendees in Google Calendar, as well as allow students to call in if they do not have access to a computer or tablet.

All of our students and Staff already have active Google accounts and can access these resources using their Harlan County Schools account. Your username and password are your e-mail address and current password you use to log onto your computer with. These resources are managed by the district and are compliant with the freedom of information act and open records requests through Google vault. These are the recommended options to all teachers and staff that are considering beginning the use of teleconferencing and remote classroom with their students. If a student does not know their e-mail address and password or if you have any questions regarding the use of the following resources please contact Doug Bowling or Mike Scott with the HCPS Technology Department and they will assist you.
