Students in the Cumberland Elementary 21st Century Community Learning Center recently created their own doughnuts. The doughnuts were made using biscuit dough and small plastic cups to cut out the holes. Students were able to make doughnuts and doughnut holes. After their doughnuts and doughnut holes were fried students were able to choose the flavoring for their doughnuts. They could have them plain, with powdered sugar, with plain sugar, or with cinnamon sugar.

Mrs. Terry shows students the proper way to cut out the holes for their doughnuts.
Step 1: Cut holes out in your biscuit dough for your doughnut!

Step 2: Deep fry your biscuit dough!

Step 3: Now you have delicious doughnuts and doughnut holes to eat!
