

Cumberland Elementary School kindergarten and first grade students participated in a fire safety activity recently. Members of area fire departments spoke to the students about fire safety, having fire escape plans and the importance of smoke detectors. They learned about stop, drop and roll and other safety measures. Afterward the students were able to examine the fire trucks and equipment. Students received treat bags containing hats, stickers, coloring books and other goodies. This event was sponsored by the Cumberland Elementary School Family Resource and Youth Service Center.
