

Students in John Middleton's seventh-grade science class at Evarts Elementary School recently performed work on their egg drop devices. The students were tasked with creating a device designed to minimize the contact force applied to the egg as it hits the ground.

*Principal Sherry Anglain visited the class to assist a group of Carly Madden, Abbigail Coleman and Santanna Coots in the construction of their design.*

Assistance Principal Tammy Fields inflated balloons with students Dion Brown, Conner Eldridge, and Joseph Ewing.

*Alexis Freeman, Alexis Vargas, and Hunter Napier attached rope to sponges that will contain their egg.*

*Seventh-graders Olivia Freeman and Destiny Farley performed work on their egg drop device.*
